

# GOVERNMENT OF ALBERTA - DON'T LEAVE US HIGH AND DRY!

Premier Stelmach,

Cc: Minister of the Environment, \_\_\_\_\_ (Write your MLA's name here)

Don't leave Albertans and our natural environments high and dry in making changes to the Alberta Water Act! A just and effective outcome for our provincial water laws will ensure there is meaningful consultation with the public and First Nations and that **clean water** is prioritized and protected first for Alberta families, ecosystems and for future generations.

I further urge you to reject proposals to deregulate the water allocation system and move to a market system which would allow FITFIR senior license holders the right to make a profit off of water trades. Water is too precious to be left to market forces and profit motives. We need a water policy, which clearly defines priority uses and ensures protected access to the places and people that need it the most, not just to those who can pay.

As supply of our water becomes increasingly constrained, we need to ensure that we have protected enough clean water for our highest value uses - Alberta families, ecosystems and for future generations.

Sincerely,
